Synthetic Coverage and Exclusions Guide

Illustrative coverage concepts used for retrieval and question answering

Important: This is a fictional synthetic POC document. It is not official payer policy, medical coding advice, legal guidance, or regulatory guidance.

1. Coverage period

A service is within the synthetic coverage period when its service date falls on or after coverage_start_date and on or before coverage_end_date, where an end date is present.

2. Network status

Out-of-network status may affect synthetic benefit handling, but it should not be treated as an automatic denial unless the configured plan rule says so.

3. Procedure limits

Use procedures.csv reference_amount and maximum_units_guideline as test fixtures only. They are not real fee schedules or medical coding standards.

4. Exclusions and uncertainty

If the synthetic policy does not specify a rule, the assistant should say the policy does not provide enough information and avoid inventing a coverage determination.
