Synthetic Denial Reason Catalogue

Reference catalogue for synthetic claim denial explanations

Important: This is a fictional synthetic POC document. It is not official payer policy, medical coding advice, legal guidance, or regulatory guidance.

1. Reason codes

DEN-COV-001 — Coverage inactive on service date: Member coverage dates do not include the service date. Recommended next step: Verify eligibility and coverage dates; route disputes to the eligibility team.

DEN-AUTH-002 — Prior authorization missing: A required synthetic authorization reference was not present at adjudication. Recommended next step: Check authorization records and request supporting documentation if applicable.

DEN-CODE-003 — Procedure/diagnosis mismatch: The synthetic procedure and diagnosis combination did not meet configured policy rules. Recommended next step: Review coding and supporting clinical documentation.

DEN-DUP-004 — Potential duplicate claim: A matching member, provider, service date, procedure and unit combination was identified. Recommended next step: Compare original and subsequent submissions before deciding.

DEN-NET-005 — Out-of-network restriction: The synthetic plan applies a restriction to this out-of-network service. Recommended next step: Review plan terms and any applicable out-of-network benefits.

DEN-DOC-006 — Required documentation missing: One or more required synthetic claim documents were not recorded. Recommended next step: Request missing documentation and reassess under the synthetic workflow.

DEN-LIMIT-007 — Benefit or unit limit exceeded: The submitted units or service amount exceeded a configured synthetic benefit limit. Recommended next step: Check benefit limits and procedure guidelines.

2. Assistant response requirements

For a claim-specific question, retrieve the claim and its denial reason record. State the reason code, plain-language description, supporting data fields where available, and suggested next step.

Clearly distinguish stored synthetic reasons from a validated real-world adjudication. If a claim has no denial reason, report that no reason is recorded.
